Starting in FY2016 EPA began to implement a two year cycle process around developing National Program Guidance from our five major National Program offices – Air and Radiation; Water; Land and Emergency Management; Chemical Safety and Pollution Prevention; Enforcement and Compliance Assurance – along with the Office of Congressional and Intergovernmental Relations; the Office of International and Tribal Affairs and the Office of Environmental Information.

We are beginning the process of development of the FY2020-2021 National Program Guidance, which will be the first issued under the agency's recently finalized [Strategic Plan](#).

The purpose of this call is to begin getting feedback on your states' priorities, strategies and any flexibilities in grant work plans needed to advance those priorities. **Please note that that program directors from DEC are invited to join as well.**

This is a new way to develop this guidance, and I'm looking forward to having this conversation at the regional level.

If you have any questions please let myself or Sean Dixon know.

Thank you!
